Describe/Discuss the result of PLSLO #1

Describe how the results of the assessment were disseminated and to whom? (What was the program’s process for reviewing the results and discussing the implications of the results?)

Data from fall 2011 show that the unduplicated headcount of students who declared they were “Undecided on their educational goal” was 516 students. After a pop-up window where students could update their educational goal was implemented during the registration process for the fall 2012 semester, the data showed an unduplicated headcount of 47 students who declared “Undecided”. This is a significant difference that demonstrates the impact of the efficacy of the change in policy and Portal technological development.

Discuss how the results were used to either: confirm the SLO was successfully met, and/or how the program generated strategies for program modification.

Results indicate the SLO was met since a significant number of students updated their educational goal during the registration process. Future strategies will include what to do for students who do choose “Undecided” as a goal for 2 or more semesters.

If applicable, discuss program modifications changes and timeline for implementation of changes.
While this feature may not be modified, conversations with the Counseling Department in the fall will help the college develop a plan to approach students who are undecided about their education goals.

What resources are needed to improve your program?
If A& R and the Counseling Department decide to do targeted outreach to students who are undecided on their ed goals for 2 semesters or more, additional staff or assigned time may be necessary to do outreach to those students.
