The college’s GE program has not been reviewed or revised for a long time. We have entered the 21st century now and not only has the world changed significantly but also the skills required to survive have evolved as well. To address this, the Academic Senate proposes to establish a subcommittee on General Education with the following charge:

- Research and compare our GE program with GE Programs at other community colleges or four-year colleges.
- Review and revise/update the overall framework of the General Education Program in light of the college’s GE SLOs.
- Review current General Education Offerings for accuracy.
- Recommend a procedure going forward for the selection and approval of courses to count for College of Marin General Education requirements.
- Recommend the criteria for the selection of GE courses.
- Propose to the Academic Senate revisions to AP 4025 Criteria for Associate Degree and General Education with the above recommendations in mind.

As this is a curricular issue of major importance and as the Chairs are ex-officio members of the curriculum committee, this committee will be made up of the chair or the chair’s designee from each of the following departments.

- Behavioral Sciences
- Life and Earth Sciences
- Math
- Physical Sciences
- Social Sciences
- Physical Education/Health
- Communication
- English/Humanities/Philosophy
- College Skills
- Modern Languages

- Fine Arts
- Performing Arts
- Business Information Systems
- Career and Technical Education
- Health Sciences
- Counseling
- Library
- DSPS

Resource persons will include the Articulation Officer, the Academic Deans, and the Vice-President of Student Learning.
