Potential International Partnership Opportunities Explored
While we made no formal commitments with Fengtai while in Beijing, we did commit to exploring the development of:

- ESL and IEP programs
- 1+1 joint academic and vocational programs,
- Online distance learning,
- International student recruitment,
- Curricular practical training and optional practical training,
- Student and faculty exchanges, and
- Opportunities for cross-cultural research and collaboration.
One tangible outcome:

Fengtai is interested in contracting with College of Marin for the purpose of assisting in the development of an Intensive English Language Program modeled after our own program.
