Launching the Data Dashboard from the Intranet

The Data Dashboard can be accessed via the “Data Dashboard” folder on the College Intranet. Due to security settings, you must use a computer on campus that is part of the College Network to access the Dashboard on the Intranet.

Note: It is recommended that you use Internet Explorer and a PC that uses either Vista or XP as its Operating System. You will not be able to access the Dashboard on all Internet browsers or on a Mac.

1. Open the Intranet
   a. Go to the College Homepage (www.marin.edu) and type “Intranet” in Internet Explorer. (You must be using a computer on campus that is on the College Network).

2. Open the Data Dashboard Folder & Double click on the Data Dashboard link.
   The Data Dashboard is located in the folder list on the left side of the Intranet First Page.
After double-clicking on the link, you will see the Argos screen first and then the Dashboard. Depending on where you are connected, you may need to wait a several moments for the Dashboard to fully launch. (If you are not already logged in to the network, you may be asked to enter your network login (firstnamelastname) and password.)

You are now ready to explore the Data Dashboard!
