On February 11th, 2013, the Educational Planning Committee received a progress report on Strategic Plan Action Step 8.2, regarding the development of a comprehensive Maintenance and Operations Plan. The progress report indicated only 5% progress toward the achievement of this Actions Step for 2012-2013 and did not anticipate any further progress this year. Lack of resources was cited as the reason for the lack of progress.

The Educational Planning Committee brought this information back to PRAC in March. PRAC is forwarding this information to you for the following reasons:

1. A comprehensive Maintenance and Operations Plan has been stalled for many years.
2. Elements of this plan are a major part of the College’s Self-Study Report Planning Agenda for Standard III.B. Physical Resources (Planning Agenda #19, 20, 21 and 22)
3. These elements must be addressed as part of the mid-year report to ACCJC.
4. This plan is included in the current Strategic Plan.
5. Perhaps more importantly, such a plan would enable the college to use the resources more efficiently.

PRAC recommends (again) that a viable Maintenance and Operations Plan be drafted, adopted and implemented. Are there plans or strategies for resolving this impasse?
