How to draw side-by-side boxplots in Excel 2007

1. Highlight the whole table, including figures and series labels, then select Insert from the main menu.

2. Under Charts select a Line chart and choose the Line with Markers option.

4. Right-click on a data point from the first data series, and choose **Format Data Series > Line Color > No line** to remove the connecting lines. Repeat for the other four data series in turn.

5. Select any of the data series and under Chart Tools select **Layout > Analysis > Lines > High-Low Lines**, then **Layout > Analysis > Lines > Up/Down Bars > Up/Down Bars**.
